

Easy Exercise – Grade Calculator

Challenge

- Create an application which asks the user for an input for a maths mark, a chemistry mark and a physics mark.
- Add the marks together, then work out the overall percentage. And print it out to the screen.
- If the percentage is below 40%, print “You failed”
- If the percentage is 40% or higher, print “D”
- If the percentage is 50% or higher, print “C”
- If the percentage is 60% or higher, print “B”
- If the percentage is 70% or higher, print “A”

Example

Welcome to Grade Calculator

Please enter your maths mark: 67

Please enter your chemistry mark: 63

Please enter your physics mark: 80

Your percentage score is: 70.0%

You scored a grade of: A
